

Audited Mineral Resources for Tajitos as of 31 December 2023

Fresnillo Plc.

0723033

2 Audited Mineras Parreña Tajitos Mineral Resource statements of Fresnillo Plc.

2.1 Mineral Resources for Mineras Parreña Tajitos

Table 2.1 Fresnillo Plc. 31 December 2023 Audited Mineral Resource statement for Tajitos, AMC Mining Consultants (Canada) Ltd.^{1, 2, 3, 4}

Tajitos - open pit		Cut-off: 0.17 g/t Au	
Category	Quantity	Grade	Contained metal
	Tonnes (kt)	Au (g/t)	Au (koz)
Measured	-	-	-
Indicated	57,862	0.38	704
M+I	57,862	0.38	704
Inferred	30,296	0.33	325

Notes:

- 1 Reasonable prospects for eventual economic extraction (RPEEE) criteria have been applied to the open pit Mineral Resources through the application of cut-off grades and the use of a constraining pit shell based on a US\$1,650/oz Au price, using similar inter-ramp angles used for Ore Reserve pits.
- 2 Assays were capped where appropriate. All figures rounded to reflect the relative accuracy of the estimates.
- 3 The Tajitos Mineral Resource is reported at a cut-off of 0.17 g/t Au for all material types.
- 4 The Mineral Resources were estimated by Fresnillo. Justin Glanvill, Pr.Sci.Nat. (SACNASP #400164/07), a Competent Person, reviewed and audited the Mineral Resource estimates.
